Safety Alert

ProJet™ Wash Tank fill tubing

ProJet™ 1000/1500 Printers

Purpose: Inspecting the ProJet™ Wash tank tubing for signs of damage.

We have received several calls regarding the tubing used to fill the ProJet™ wash tank with the Clean-A-Part solution. Please inspect your tubing thoroughly to look for signs of damage caused by over tightening the clamp which seals the tubing to the tank spout. Please also inspect the tubing for any sweating, swelling or cracking. If you discover that your tubing has any of these please contact 3D Systems for further instructions.
