

July 18, 2014

Dear Customer;

Effective immediately, due to changes in worldwide shipping regulations, all airfreight shipments containing ColorBond infiltrant have been deemed "Class IX/Hazardous" and are subject to costly fees per shipment. We recommend planning ahead and shipping via ground transportation whenever possible to avoid these fees.

Please note that these shipping charges are **ONLY for airfreight and do not impact ground shipments.**

An updated Safety Data Sheet (SDS) for ColorBond can be found [here](#).

Please don't hesitate to contact myself, or our service support department, should any questions or concerns arise.

Sincerely,

A handwritten signature in black ink, appearing to read "Ryan Schneider".

Ryan Schneider
