Release Notes

ProJet[®] CJP x60 firmware version 12.19.0.0

1 INTRODUCTION

Thank you for installing the x60 Printer Firmware, version 12.19.0.0.

The ProJet® x60 Series incorporates many features that automate and streamline the 3D printing process. The easy-to-use, quiet, office-friendly design, combined with high-performance composite materials, makes the ProJet® x60 Series the most cost-effective 3D printers available today for rapid prototyping.

This document outlines important information about this release. For additional information on x60 Printer Firmware see the User Guide at <http://infocenter.3dsystems.com/projetcjp60/>.

2 INSTALLATION

SYSTEM REQUIREMENTS

For the latest system requirements information and to learn about specific qualified system configurations, go to <http://infocenter.3dsystems.com/projetcjp60>, click on 'User Guide' in the left navigation bar, click ProJet X60 Series Overview, then Computer/System Requirements.

Check the support section of the Web site for the latest system requirement information and specific qualified systems.

DOWNLOAD AND INSTALL SOFTWARE

Visit <http://infocenter.3dsystems.com/projetcjp60>, click on 'Software Downloads' in the left navigation bar, then click on the latest x60 Printer Firmware file under the '3DPrint' heading in the main window. The x60 printer firmware uses a file with a '.ZDF' extension. You may also find a version of the firmware in the 'Firmware' directory in the 3DPrint installation folder, if you've installed 3DPrint. The version on the web may be newer than the version installed with 3DPrint.

LICENSING AGREEMENT

Please see the End User License Agreement (EULA) located in the 'Notices' section of the x60 Printer Firmware User Guide for complete terms and conditions of the license. See above for steps to access an online version of the guide.

DEVICE DRIVERS

The x60 Printer Firmware includes all of the required device drivers for the printer's internal hardware.

REQUIRED HARDWARE
