

ProJet® MJP 2500W

Professional 3D Printers

Release Notes

Firmware version: 2.0

3D Sprint™ Software: 2.9

Release Date: July 2018

Firmware: [ProJet® MJP 2500W firmware version 2.0](#)

3D Sprint™ Software: [2.9](#)

Release Date: July 2018

1 INTRODUCTION

We are proud to announce the new printer firmware version 2.0 and 3D Sprint™ Software 2.9

For more help and information, please visit the [Software Downloads](#) tab located in the Product Information Center.

2 NEW FEATURES

- New look and feel printer UI
- Improved build speeds for jobs with smaller X extents

3 IMPROVEMENTS

- The software verifies that material cartridges are genuine to prevent possible compromised part quality and print head damage from the use of non-genuine material cartridges. Material cartridge information and certain printer performance parameters are collected, but no personal or design data are collected.
- Turned off hood fans during head maintenance cycles to improve part quality
- Print head carriage is now parked on the right side after completing jobs to improve part quality
- Fixed part quality issues for short builds
- Allow multiple email addresses for alert email feature
- Fixed bottle warming up time on the UI
- Increased job slicing performance and reliability
